Mohammad Montasim Al Mamun Shuvo

Senior SWE | MERN, Azure, Cloud | Scalable SaaS
Dhaka, Bangladesh

Summary

I build web platforms that . With over + years of experience, I specialize in building - platforms that handle real-time video, , and high-stakes interactions—without breaking. I build features; I design deterministic systems where every state transition is intentional, and every feature toggle is tenant-aware. : ▪# Performance: Boosted React app performance by % and achieved Lighthouse + scores by eliminating legacy libraries and building custom components. ▪# Cost Efficiency: Reduced cloud infrastructure costs by % by migrating Azure VMs to App Service with automated CI/CD pipelines across environments. ▪# Precision: Built a real-time computer vision pipeline (MediaPipe) with %+ production accuracy, featuring adaptive frame rates and multi-person detection. ▪# Architecture: Designed a deterministic Finite State Machine (FSM) engine with + states to replace scattered async chains, ensuring zero race conditions during AI analysis. ▪# Leadership: Promoted from Junior to Senior within one company; mentored engineers and introduced code reviews that cut production bugs by %. : ▪# Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Redux Toolkit, WebRTC. ▪# Backend & Data: Node.js, Express.js, WebSockets, REST APIs, MongoDB, Prisma. ▪# Cloud & DevOps: Azure App Service, Docker, GitHub Actions, CI/CD. ▪# Testing & Tools: Jest, React Testing Library, Lighthouse, Figma, Git. ▪# Specialized: Real-time video processing, Canvas-based annotation, SSO, and System Design. : I design for worst-case scenarios — building scalable SaaS systems with predictable state transitions, resilient lifecycles, and reliable asynchronous workflows. : ▪# Developed a multi-tenant - healthcare SaaS product. ▪# Delivered HIPAA-compliant Telemedicine web application for real-time video consultations. ▪# Built a Microservice for post-processing and correcting biometric data. ▪# Published an open-source NPM package address-bd, providing complete Bangladesh address data with 8 divisions, 64 districts, and 495 upazilas

Experience

MyMedicalHub International

3 years 7 months

Senior Software Engineer

October 2025 - Present (8 months)

MyMedicalHUB International, Ltd. Haque Tower (8th Floor), JA-28/8 D, Mohakhali, Dhaka

- # Architected FSM-based biometric assessment engine replacing scattered useEffect chains — deterministic transitions across camera calibration → pose detection → recording → AI analysis
- # Led full rewrite of medical assessment chatbot — Toolkit slice with dynamic question routing, conditional visibility, audio pipeline, and multi-step form scaffolding
- # Built a hybrid processing pipeline supporting simultaneous AI rep counting + video analysis with adaptive frame rate
- # Designed imperative recording control, eliminating React state-driven video lifecycle — instance reuse, generation counter pattern for state resets
- # Implemented - feature gating across + toggles — client-specific workflows, direct-to-consumer flows, and - detection modes
- # Refactored component architecture to presentational/container separation — extracted business logic from + JS modules across
- # Own frontend architecture for - biometric measurement system with zoom, pan, and annotation overlays
- # Lead , technical decisions, and mentor junior engineers across multi-service frontend

Software Engineer

October 2023 - September 2025 (2 years)

MyMedicalHUB International, Ltd. Haque Tower (8th Floor), JA-28/8 D, Mohakhali, Dhaka

- # Led front-end performance optimization — cut React app load times by %, resolved rendering bottlenecks across devices
- # Reduced hosting costs by % — led migration from Azure Virtual Machines to App Service with CI/CD pipelines for automated builds, tests, and deployments
- # Designed and shipped a full system — token management, CSP headers, demographic data sync, and OAuth redirect fix in production
- # Built biometric strength assessment module from scratch — integration, - config, rep counting, video recording with dynamic duration

- # Implemented real-time pipeline — posture validation, face orientation checking, out-of-frame handling
- # Removed legacy UI libraries (bootstrap, reactstrap, etc.) — replaced with custom-built modal, pagination, and tooltip components
- # Shipped API-driven dynamic theming system — color config, favicon, copyright per client; eliminated legacy CSS framework
- # Delivered medical report viewers with / , data tables with merged cells, and citation integration (feature-flagged)
- # Built session recording pipeline — MediaRecorder API + , production deployment across environments
- # Designed a - (patient/provider/admin) with role-based UI and pain assessment with interactive visual scales
- # Shipped QR code generation system, cross-platform deep linking, analytics integration, error logging pipeline, and mobile device detection

Junior Software Engineer

November 2022 - October 2023 (1 year)

Arnob, Flat 5B & 5C, H-46, Shahmukhdum Ave, Sector-13, Uttara, Dhaka

- # Developed a - annotation interface for post-measurement biometric data correction
- # Integrated (//) for real-time video consultations between providers and patients
- # Built registration validation, telemedicine UI components, and data sanitization layers
- # Implemented measurement drawing tools (lines, angles) on patient movement images for range-of-motion assessment
- # Built a REST API client layer with JWT authentication for medical data services
- # Configured / across environments (dev, staging, UAT, production) with environment-specific endpoints
- # Applied CSP headers and XSS protection for platform security
- # Fixed patient routing — resolved assessment redirect issue for invited existing patients
- # Cut patient diagnosis time by % by optimizing workflows and integrating AI-driven posture analysis.
- # Engineered real-time joint-angle measurement algorithms into live video sessions, achieving %+ accuracy in assessments.
- # Optimized the front-end video pipeline, reducing call latency, and improved rendering speed, resulting in higher clinician and patient satisfaction.

Multiversal Software Ltd

Junior Frontend Developer

August 2022 - October 2022 (3 months)

Sector-13, Uttara, Dhaka, Bangladesh

- # Built and maintained UI components for a telemedicine platform using React.js, JavaScript, HTML5, and CSS3, improving user experience across devices.
- # Debugged and optimized front-end code, reducing page load time and enhancing performance stability.
- # Contributed to feature development, documentation, and version control workflows, ensuring smooth collaboration across teams.
- # Gained hands-on experience with , , and production-ready , laying a strong foundation for a full-time engineering career.

Disabled Rehabilitation and Research Association (DRRA)

9 months

Computer Instructor

February 2022 - August 2022 (7 months)

Ershadnagar, Tongi, Gazipur, Dhaka, Bangladesh

:

- # Designed and delivered a comprehensive curriculum to develop fundamental and advanced computer skills in a student-centered classroom environment.
- # Fostered student confidence through effective instruction and .
- # Ensured technical reliability through software updates and .
- # Oversee fair assessments and track student progress.
- # Developed , Microsoft Word, and Microsoft PowerPoint skills.
- # Made a lasting impact on students' computer proficiency.

:

- # Developed a comprehensive curriculum that aligned with industry standards
- # Increased student confidence and proficiency in computer skills
- # Ensured a positive and productive learning environment
- # Made a significant contribution to the organization's mission

Management Information System Officer

December 2021 - August 2022 (9 months)

Ershadnagar, Tongi, Gazipur, Dhaka, Bangladesh

:

- # Designed and delivered a comprehensive curriculum to develop aligned with industry standards.
- # Fostered student confidence through effective instruction and classroom management, creating a positive and productive learning environment.
- # Ensured technical reliability through , minimizing disruptions to the teaching and learning process.
- # Oversee fair assessments and track student progress, providing feedback and support to help students achieve their goals.
- # Developed , Microsoft Word, and Microsoft PowerPoint skills, preparing students for success in the workplace.
- # Made a lasting impact on students' , empowering them to use technology effectively and responsibly.

:

- # Increased student confidence and proficiency in computer skills are essential for success in the digital age.
- # Ensured a positive and productive learning environment where students can thrive and reach their full potential.
- # Contributing significantly to the organization's mission by preparing students for success in the workforce and beyond.

Codez Info Tech.

Web Developer

May 2021 - November 2021 (7 months)

Adarsha Nagar, North Badda, Dhaka, Bangladesh

:

- # Develop and maintain web applications using PHP and JavaScript
- # Support the development, maintenance, and updating of websites
- # Suggest ways to improve programming techniques, applications, and client deliverables
- # Create and execute test scenarios
- # Analyze client needs and develop appropriate functionality without overbuilding
- # Resolve customer complaints and respond to suggestions for product improvement

Education

Bangladesh Army University of Science & Technology (BAUST)

Bachelor of Science, Computer Science and Engineering · (November 2016 - March 2021)

Carmichael College

Higher Secondary Certificate (HSC), Science Group · (2014 - 2016)

Rangpur Zilla School

Secondary School Certificate (SSC), Science Group · (2006 - 2014)
